FACILITY NEEDS FOR HOSTING A WORKSHOP

Tell us about your facility's pool, equipment and lecture room.

POOL / EQUIPMENT DETAILS

1. Please provide a detailed drawing /diagram of the pool design, deck area, etc. (Photos are great!)
2. Water depths: (Clearly define which areas are shallow and deep on the drawing/diagram)
3. Average water temperature: (Preference is 82-86 degrees for most workshops)
4. Is the pool INDOOR or OUTDOOR?
5. Can you provide exclusive use of the pool for the hours required for the workshop? (Most workshops need 1.5 to 2 hours in the morning and 1.5 to 2 hours in the afternoon for pool time. Note: You will not need to shut the pool down all day.)
6. Do you have a waterproof cordless microphone or other speaker system?
7. Do you have a music system with CD player?
8. Some workshops include the use of water-exercise equipment, such as buoyancy barbells, belts, etc. Please provide a list of the type of equipment and quantities that are available. If other specialized equipment is used, this will be shipped into your facility. A safe, secure place is needed to store any equipment that is shipped to you.

LECTURE ROOM DETAILS

1. Is there a lecture room available that can be set up with tables and chairs for up to 30 attendees?
2. Can the lecture room be reserved all day, so we can have a home base to leave belongings while at the pool? The lecture room is typically needed from 7:30 am to 6:00 pm.
3. Can you provide the following classroom support equipment: (Not all may be needed)
 - Additional tables for Robin
 - TV with DVD player
 - LCD projector and screen
 - Extension cords

IMPORTANT NOTE

The host facility must be available to help with set up before the event. Also, if equipment is shipped to your facility, the host must be available to help with drying and repacking any leftover equipment after the event.

If you have questions, contact Robin at aquaticsandmore@gmail.com or call 360-931-0435.
